Vertical Integration: A Strategy Designed to Create Efficiencies and Value for the Apartment Fund

Vertical integration occurs when a company takes strategic ownership of different stages of its operational value chain.¹ In real estate, this level of oversight can support more disciplined capital deployment, tighter cost control, and a consistent vision across the lifecycle of an asset.

Rather than relying on third parties, a vertically integrated multifamily platform brings key capabilities in-house, with dedicated teams responsible for:

- **Investment management:** Well-timed acquisitions, thorough due diligence, and the development of appropriate financial and capital structures
- **Asset management:** Property-level business plan execution, maintenance, and value creation through capital expenditures, supported by regular performance reporting
- **Development management:** Site selection, market and feasibility analysis, concept and design development, and approvals process expertise
- **Construction management:** Detailed construction scheduling, procurement oversight, and budget and cost control
- **Property management:** Leasing, repairs and maintenance, and Resident experience, supported by customer service and cost-effective, value-creating technology

Managing these teams internally can help firms maintain greater control across the asset lifecycle, improve coordination, and streamline decision making toward shared outcomes. This integrated approach can sometimes limit additional inefficiencies and delays that may arise when hiring third parties. For example, dedicated in-house property management can respond quickly to requests and improve operations, thereby reducing costs, while providing better Resident experiences and satisfaction. These strategic advantages are therefore designed to help support the long-term performance of the Fund.

Vertical integration in real estate can also include a development-to-management approach. This approach can complement traditional acquisition-based strategies by creating value from the ground up.

Equiton’s Apartment Fund is doing exactly that with its Ottawa development, Maison Riverain, from targeted site selection and focused execution to long-term asset stewardship. Through the vertical integration of the project’s value chain, the Apartment Fund has delivered its first of three towers by advancing each phase of development and construction efficiently, culminating in lease up and property management. When complete, the project will add 1,100+ residential units, which will continue to be managed by Equiton Living, Equiton’s in-house property management team.

Liquidity

Redemption Framework	Under the Asset-Aligned Liquidity Framework (“Framework”), redemptions will be processed monthly with 90 days’ notice and managed up to 2.5% of net asset value (NAV)* per quarter and 10% annually. Some periods may offer more liquidity, depending on market conditions and the Fund’s needs.
Redemption Suspension	The Trust has never suspended redemptions. If total redemption requests exceed the amount that will be paid within the Framework in a period, the portion that will not be paid in cash will be converted to Redemption Notes (promissory notes).
Redemption Notice	The monthly redemption date (the “Redemption Date”) is the 15th day of each month. If the 15th day of the month is not a Business Day, the Redemption Date for that month will be the next succeeding Business Day. The Redemption Notice must be received no later than 90 days before the Redemption Date to be considered for that Redemption Date.

*NAV means the average net assets attributable to Unitholders.

IMPORTANT INFORMATION:

This communication is for information purposes only and is not, and under no circumstances is to be construed as, an invitation to make an investment in Equiton Residential Income Fund Trust (the "Trust") or with Equiton Capital Inc. Investing in the Trust's Units involves risks. There is currently no secondary market through which the Trust Units may be sold and there can be no assurance that any such market will develop. A return on an investment in Trust Units is not comparable to the return on an investment in a fixed-income security. The recovery of an initial investment is at risk, and the anticipated return on such an investment is based on many performance. Although the Trust intends to make distributions of its cash to Unitholders, such distributions may be reduced or suspended. The actual amount distributed will depend on numerous factors, including the Trust's financial performance, debt covenants and obligations, interest rates, working capital requirements and future capital requirements. In addition, the market value of the Trust Units may decline if the Trust is unable to meet its cash distribution targets in the future, and that decline may be material.

Recipients of this document who are considering investing in the Trust are reminded that any such purchase must not be made on the basis of the information contained in this document but are referred to the Confidential Offering Memorandum, provided to you by the Trust ("Offering Memorandum"). A copy of the Offering Memorandum may be obtained upon request made to the attention of Equiton Capital Inc. It is important for an investor to consider the particular risk factors that may affect the industry in which it is investing and therefore the stability of the distributions that it receives. The risks involved in this type of investment may be greater than those normally associated with other types of investments. Please refer to the Offering Memorandum for a further discussion of the risks of investing in the Trust.

PAST PERFORMANCE MAY NOT BE REPEATED. Investing in the Trust Units can involve significant risks and the value of an investment may go down as well as up. There is no guarantee of performance. Only investors who do not require immediate liquidity of their investment should consider a potential purchase of Units.
